

CU upper-division E&M curriculum

Indicates a research-demonstrated benefit

Overview

Supplementary activities for upper-level E&M. All materials are modular and can be mixed and matched with any other teaching strategy or materials.

Type of Method

Full curriculum, Curriculum supplement, Tutorials

Level

Designed for: Upper-level Undergraduate

Can be adapted for: Intermediate, Graduate School

Setting

Designed for: Lecture - Large (30+ students) , Lecture - Small (<30 students)

, Recitation/Discussion Session, Homework

Can be adapted for: Out-of-class tutorials

Coverage

Many topics with less depth, Traditional upper-division E&M I coverage (e.g. first half of Griffiths text)

Topics

Electricity / Magnetism

Instructor Effort

Medium

Resource Needs

TAs / LAs, Clickers / polling method, Projector

Skills

Designed for: Conceptual understanding , Problem-solving skills , Using multiple representations, Identifying appropriate method to solve particular problems, Faculty attention to student difficulties.

Can be adapted for: Making real-world connections, Metacognition

Research Validation

Based on research into: theories of how students learn , student ideas about specific topics

Demonstrated to improve: conceptual understanding

Studied using: student interviews , classroom observations , research at multiple institutions
