

## Context-Rich Problems

Indicates a research-demonstrated benefit

### Overview

Students work in small groups on short, realistic scenarios, giving them a plausible motivation to solve problems.

Type of Method

Curriculum supplement

Level

**Designed for:** Intro College Calculus-based

**Can be adapted for:** High School, Intro College Algebra-based, Intro College Conceptual

Setting

**Designed for:** Recitation/Discussion Session

**Can be adapted for:** Lecture - Small (<30 students), Studio

Coverage

Many topics with less depth

Topics

Mechanics, Electricity / Magnetism, Waves / Optics, Thermal / Statistical

Instructor Effort

Medium

Resource Needs

Tables for group work

Skills

**Designed for:** Conceptual understanding , Problem-solving skills

**Can be adapted for:** Making real-world connections

Research Validation

**Based on research into:** theories of how students learn , student ideas about specific topics

**Demonstrated to improve:** conceptual understanding , problem-solving skills

**Studied using:** classroom observations
